**RESPONSE TO OFFICE COMMUNICATION OF  
FEBRUARY 4, 2009**

Dear Sir or Madam:

This paper is submitted in response to the Office Communication of February 4, 2009, to provide a Summary of the Telephone Interview of January 29, 2009.

**Telephone Interview Summary**

On January 29, 2009, a telephone interview was conducted between the Examiner and Mark S. Williams (Reg. #50,658), in which the intended scope of the independent claims was discussed, particularly the nature of the graphical program claimed, the nature of the embedded sensor device, the communication/transfer path whereby the graphical program is transmitted to the embedded sensor device, and the fact that the cited art was not directed to such. Applicant suggested amending the independent claim to emphasize that the graphical program includes a plurality of interconnected nodes or icons which visually indicate the functionality of the program, and requested that the Examiner reconsider the scope of the cited art and the patentability of Applicant's claims in light of the above. The Examiner indicated that he would need to search and consider further in light of the new understanding.

## CONCLUSION
